

“ The Cloud Layering System blends external protection from elements with internal temperature control ”

Sierra Designs

The Cloud Layering System blends external protection from the elements with internal temperature control, offering a light, versatile, three-piece system for all-day, go-anywhere performance and comfort. The Cloud Airshell (SRP \$125) features the new two-layer, waterproof/breathable Illusion fabric for ultralight, ultra-compact protection from

wet weather. The Cloud Puffy (\$249) is an ultralight, 800-fill insulating layer featuring hydrophobic DriDown insulation. The Cloud Windshell (\$119) offers breathable protection and warmth on windy days. The Cloud layering system packs small and weighs in at just 22 ounces.
