### Sierra Designs

With three pieces in its Cloud Layering System (above), [Sierra Designs](#) separates your windproof layer from your waterproof-breathable layer, while promising warmth, weather protection, and versatility, all in a 22-ounce package. When on the go, start out with the **Cloud Windshell** (6 oz, \$119) made with 100-percent polyester with two-way mechanical stretch. Add the 800-fill DriDown **Cloud Puffy** (12 oz, \$249) when you stop moving. If it rains, add the two-layer waterproof-breathable Cloud Airshell (4 oz, \$125), which packs down to the size of a few energy bars.
